

# Anti-Slip & Durable

## Corrosion Resistant

Suitable for industrial, commercial, recreational, and other uses.

## Galvanized Iron Grating

Our Serrated Galvanized Iron Gratings are galvanized surface treated for corrosion resistance properties, which ensure a long service life in corrosive environments.

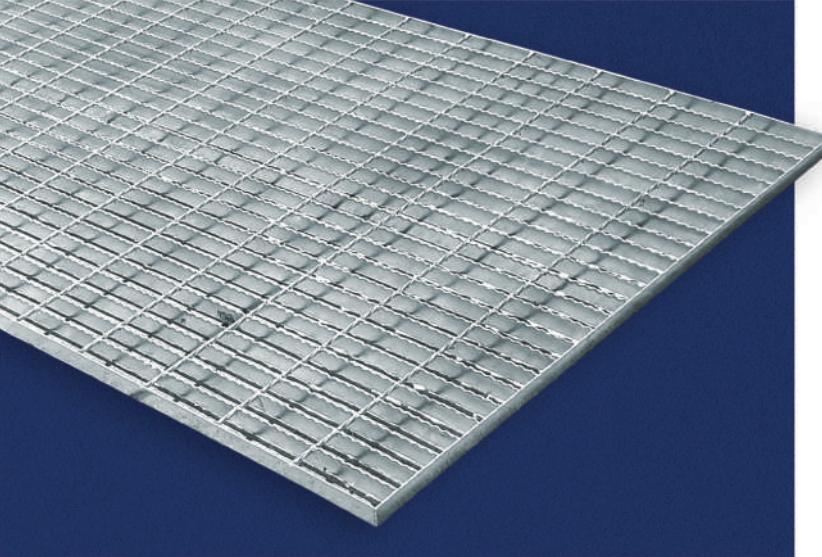

The raised surface on serrated iron grating offers excellent anti-slip properties in environments filled with water, oil and other slippery substances.

Suitable for use in ships' flooring, stair tread of gangway, catway, pump room, engine room, etc. Can also be used as platform walkway grating or drainage covers in pedestrian street and factories.

## We can customize our grating to suit your needs

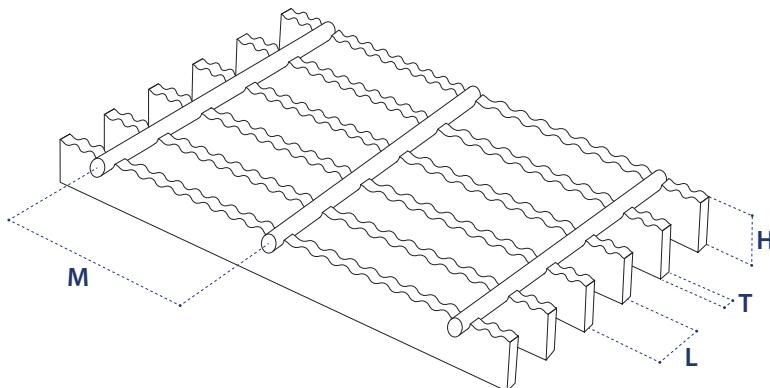

In addition to supplying Galvanized Iron stock panels. We provide our customers with cutting and fabrication services as well. Just send us your dimensions and requirements.

#### Product Features

- **High strength** and bearing capacity.
- **Anti-Slip:** A serrated surface prevents pedestrians from slipping and ensures their safety.
- **Anti-Corrosion:** With galvanized surface treatment, corrosion resistance is good, ensuring a long service life.
- **Easy to install and remove** without the use of mechanical hoists.
- Do not accumulate rain, snow and dust.

## Serrated Welded

**Butterfly Holding  
Down Clips**

(Galvanized or Stainless Steel) are available as **seperate order**.

#### Technical Specifications / Availability

IMPA Code	Cross Bar Spacing (M)	Bearing Bar Spacing (L)	Bearing Bar Depth (H)	Bearing Bar Thickness (T)	Standard Panels	Surface Type
673803, 673804	100 mm	30 mm	1 inch	3 mm	914 x 3000 mm	Serrated
